Y.M.C.A. MARATHON RUNNERS TRAIN

The medal to be given to the winner of the Y. M. C. A. Marathon race, scheduled for June 11, will be on view in the windows of Wichman's jewelry store on Thursday.

The course of the race will be a full twenty-six miles and will be as follows: Start on Kapiolani track, once round the track, then down Kalakaua avenue, down King street to Moanalua and return to Kapiolani track and then four times around the track.

This race is for men who were members of the Y. M. C. A. on February 27, and for any member whose membership has expired and wishes to renew. There will be no rubdowns allowed in this race. Nourishment and medical attendance in case of accident will be permitted.

The race will probably start at two o'clock in the afternoon.

In the meantime Dr. Hand is looking after the training of the contestants very carefully. He believes in plenty of time in which to train for such a race and has instituted a series of evening runs and paper-chases for the benefit of the runners.

There will be another night run to-night with the distance prolonged from that of last week. Next week the doctor intends to start the paper-chases, than which there is no pleasanter form of outdoor exercise.

There are two teams of contestants who are training. One is captained by F. A. Bechert and the other by John Carey. It is probable that the cross-country runs and paper-chases will take more or less the form of competitions between the two teams.

There is talk of holding other events at Kapiolani Park while the Marathon race is being run. The High School will furnish a team for a mile relay race, and it is expected that the other schools will come in. It is also hoped that a 220-yard dash straightaway race can be arranged in order to give such contestants as Billy Rice a chance to break the present Island record for the distance.

SOME MARATHON INFORMATION

The management of the coming Marathon race at the league baseball grounds is going about its business in workmanlike manner. Arrangements have been made to survey the grounds for the track, and a rough estimate of the surveyor in charge shows that the track will be almost exactly four laps to the mile.

The starting point will be so arranged that the finishing line is exactly in front of the grandstand. Each competitor will have a separate kokua station and will be allowed to take three men on the field with him to assist in handing him refreshment when it is needed.

The list of prizes is very attractive. Those who take part in the event may take either cash, cups or medals. The first prize will be \$100; the second prize, \$50; the third, \$25; the fourth, fifth and sixth, \$10; and the seventh, eighth, ninth and tenth, \$5 each.

Mr. Scully is working hard to make the affair a conspicuous success. No expense is being spared to make the best of all arrangements, and contestants and their friends may be sure that every aid will be given to the runners to help them in covering the course in record time and themselves with glory.

FIVE MILE ROAD RACE FOR Y.M.C.A.

There will be a five-mile road race for Y. M. C. A. juniors held on the afternoon of Saturday, April 17. No member over eighteen years of age will be allowed to enter. A fine solid gold medal has been put up for the winner, and the event is creating quite a stir in local athletic circles.

The course will be round town, and will give everybody a chance to watch the runners. The course will be as follows: Starting from the outside of the Y. M. C. A. on Alakea street, to King street, to Pawaa Junction, to Beretania avenue, to the junction of King and Beretania, back along King to Alakea, and up Alakea to the starting and finishing line. There will be a time limit of forty-five minutes, but it is expected that the race will be finished under thirty-five minutes.

Vapo-Cresolene

Established 1876

Whooping Cough, Croup, Bronchitis, Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs, than to take the remedy into the stomach?

It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

Those of a consumptive tendency find immediate relief from coughs or inflamed conditions of the throat.

Sold by druggists.

Send postal for booklet.

SOME DON'TS FOR AUTOISTS.

Don't sound your horn where two streets cross. Especially at night; For trolley cars are fearful folk And easily take fright.

Don't tell your chauffeur not to take Your car out when you leave; 'Twill save some disobedience that Might help to make you grieve.

Don't use a match to find a leak Of dripping gasoline Unless you're near a hospital— You'll "gather" what I mean.

Don't ever try to climb a tree When driving your machine; It shakes the people in the back And spills the gasoline.

Don't ever go around a wall, It wastes a lot of time; Just butt right through the darned old thing Or take it on the climb.

Don't let pedestrians ever think The streets were made for walking; Put on the high and run them down, It saves a lot of talking.

Don't mix highballs with high speed once, The mixture won't endure; Remember what the adage says— "The higher is the fewer."

JACK DENSHAM.

BOXING AT THE ROYAL THEATER

There was a boxing show at the Royal Theater last night. It was very entertaining to the crowd of River street and neighborhood fans who collected to watch the boxers. A twelve-foot ring was erected in front of the moving-picture curtain, and here several young Hawaiian, Japanese and Chinese boxers disputed themselves.

The show was well managed, and all boxing was done with big gloves and a clean break. The affair was an innovation in the moving-picture business and appeared to have been a great success judging by the crowd that filled the house. The prices were low and there was nothing in the way of a prizefight, as each of the boys was boxing for fun. Sam Hop was the moving spirit in the enterprise, backed by several Chinese athletic associations.

Sport Notes

A communication has been received from the boys of the Kaahumanu School objecting to having the age of George Dai Fuku compared with those of the other runners. The boys state that many of the Punahou Prep, and Central boys were over seventeen, especially the runners-up. However that may be, the Japanese was a full-grown man, and it was certainly "incongruous," as was stated in the Advertiser, to see him running and jumping with youngsters.

Dick Sullivan will travel with Billy Wieda as clan-mate on his boxing and moving picture show round the other Islands, and not with Jack Weedy as incorrectly stated in these columns a few days ago. The two good sportsmen have a fine line of dope and will hand it out to the distant parts of the Islands where moving pictures are few and far between.

WHEN HER BACK ACHES

A Woman Finds All Her Energy and Ambition Slipping Away.

Honolulu women know how the aches and pains that come when the kidneys fail make life a burden. Backache, hip pains, headaches, dizzy spells, distressing urinary troubles, all tell of sick kidneys and warn you of the stealthy approach of diabetes, dropsy and Bright's disease. Doan's Backache Kidney Pills permanently cure all these disorders. Here's proof of it in a Honolulu woman's words:

Mrs. Emma Vieira, of King street, Honolulu, Hawaii, says: "For three or four years my back ached terribly, in fact so bad that I could not describe the misery I endured. I finally received relief through the use of Doan's Backache Kidney Pills, procured at the Hollister Drug Co. I heartily recommend this remedy to anyone having backache or other kidney disorders."

Doan's Backache Kidney Pills are sold by all druggists and storekeepers at fifty cents per box (six boxes \$2.50) or will be mailed on receipt of price by the Hollister Drug Co., Honolulu, wholesale agents for the Hawaiian Islands.

Remember the name, Doan's, and take no substitute.

RETURNING COURTESIES.

The Yokohama Japanese Chamber of Commerce is in receipt of a communication from the Honolulu Chamber to the effect that the latter has been approached by the various chambers of commerce on the Pacific slope with a request that the Honolulu Chamber of Commerce join them in inviting the Japanese business men to pay them a visit in the coming autumn. The communication also states that in reply to the above the Honolulu Chamber of Commerce has addressed the chambers of commerce on the Pacific slope, stating that the Honolulu chamber will do its best in welcoming the Japanese business men on their way to the Pacific coast.

It is further stated that the chambers of commerce on the Pacific slope will issue a formal invitation to the Japanese business men in due course.

EXHIBIT WILL BE A WONDER

(Continued from Page One.)

Fine School Display.

The school exhibit will be displayed on a balcony twenty feet wide by 100 feet long. It will be assembled here by April 10 and displayed at the Armory, where it will be open to the public before being packed up for shipment to Seattle. It will form the most extensive and interesting school exhibit ever gathered in the Islands. Much of it will be displayed on tables made of koa donated by the Hawaiian Mahogany Company. Material from the other islands will be collected at Hilo, Lihue and Lahaina and then sent on here. It will comprise the work of the schools in the way of general school products, fancy work, weaving, drawing, etc.

Pineapples for All.

The pineapple growers will have a very elaborate, attractive and comprehensive display. There will be a large frame which will take 400 pineapples so as to make one large pineapple. There will be follow shipments from the Islands to keep this great pine fresh. Around this will be a miniature pineapple plantation, which will show the pines growing to the fruiting stage. Close by will be two koa chairs, also given by the Hawaiian Mahogany Company through the courtesy of J. B. Castle and others. At these tables pineapples will be served by a group of young Hawaiian girls who are to go to the Coast on a transport. This will be a very effective way of showing the quality of the Hawaiian pineapple, and giving people to understand that it is becoming one of Hawaii's choicest products.

Can Sip Kona Coffee.

The coffee exhibit will be put up by the coffee association of the Islands, and the plan is to have two ladies from here in attendance to serve Kona coffee. A battery of urns will be installed for serving hot coffee in small cups. A roaster may also be installed, so that the fine aroma of Kona coffee may fill the air. Small packages of four-year-old coffee will be sold. Growing coffee will be shown with berries.

The tropical fruit display will be one of the leading features. The commissioners expect to send a lot of fruits forward as often as the schedule of steamers permits. These shipments will include bananas, pineapples, coconuts, papayas, mangoes, breadfruit, etc. One of the central features of this exhibit will be a large structure covered with tropical fruits on a large scale. Some banana bulbs will be taken up in tubs so that they may be shown growing.

The commissioners have contracted for 1500 coconuts in the husk. They intend to make a very elaborate display of coconuts in a pyramid. Towards the end of the fair these will be given out to visitors for souvenirs. Many people are not familiar with the coconut in the husk.

House of Sisal.

The sisal exhibit is being prepared by the sisal company. The plan is to erect a structure to be entirely composed of sisal. Plants with the long poles will form the corners, and the frame will be composed of split sisal leaves. It will have a sisal thatch. Inside will be displayed bales of sisal and ropes, and in the rear will be a miniature ropeyard to show how the sisal is bleached.

The forestry exhibit is being prepared by Ralph Hosmer, Superintendent of Forestry. One of the principal features will be a display of logs of native woods of every kind growing here. One end will be split open and worked up to show what a magnificent polish all Hawaiian woods take. Half a dozen revolving koa stands will be shown on which will be displayed all kinds of ferns, plants, etc., and several varieties of mosses. Another very taking feature will be transparencies of the forestry work being done in the islands, several dozen to be installed in the large windows of the building.

Rice in Panorama.

Rice will also be a special feature, prepared under the direction of Prof. Krauss of the United States Experiment Station. A panorama 12x16 feet will be installed showing the Palama section above the railroad track, with real rice growing in the foreground. Mr. Hitchcock is being assisted in painting this panorama by Tom Sharp. A great many pounds of rice in bulk will be shown, and sheaves of the different kinds are now being collected by the experiment station for the exhibit. In the center will be two great bowls showing boiled Chinese and Japanese rice, just to show the difference.

Honey products will be displayed, the collection being prepared by the experiment station. The exhibit will be shown in a large house made of beeswax and honeycomb, and large quantities of honey in jars will be shown.

Sea and land shells will be shown by Mr. Baldwin of Maui, who is an authority and has the finest collection of shells in the islands.

Koa Will Attract.

The furniture and koa exhibit will be the best ever shipped away from here. In fact much of the interior finish of the building will be in koa. In addition to what has been purchased for the exhibition a great many very fine pieces of furniture have been donated or loaned, particularly by Lucas Bros., W. W. Harris and Mr. James of Hilo, while one or two Chinese cabinet makers of Honolulu have contributed pieces to complete bedroom and other sets. One of the features will be a gentlemen's lounge den completely furnished by Mr. James. In the koa bedroom will be an old fashioned four-poster bed.

The decorations throughout the building will be of Hawaiian origin, as for instance, coconuts in clusters, Hawaiian and American flags, and thousands

of feet of ilima leis in two colors, mats, ferns, portieres of kukui nuts, potted plants, palms, etc.

An attractive feature at one entrance of the building will be an information counter made of the very finest quality of curly koa. Here will be stationed an assistant to give out literature, and information about the Islands.

Growing Coconuts.

The commissioners propose erecting in the wing entrance a fountain and fernery, similar in some respects to the one at Moanalua, so that when one walks into the wing he is in the midst of a tropical garden. In the wing will be maintained two rest rooms, one for ladies and the other for gentlemen, fitted with all dwelling conveniences. These rooms will be done in koa. Outside will be the garden. In the center of this will be a little garden house covered with thatch, similar to many seen in the islands. Near by will be a taro patch and also some bananas and coconuts growing. Mr. Childs has some coconut trees fifteen to eighteen feet in height and clusters of coconuts will be attached.

The art exhibit will be principally made up by Howard Hitchcock, who will show from fifty to seventy-five fine paintings of Island scenes. This will be a most attractive feature. In photography, the commissioners are having a great many enlargements made of island scenes, some to be 40x50 inches. These will be used in profusion wherever there is space to hang pictures. In addition, there will be complete albums of all the islands, which will be kept in the rest rooms. The Agricultural Station exhibit will be a very comprehensive showing of products, including forage plants of all kinds, and there will be a display of garden truck, to indicate possibilities in this line in Hawaii.

In the sugar production display the commissioners anticipate making a very extensive showing, but the details have not yet been worked out.

Fine Moving Pictures.

One of the most important adjuncts to the whole exhibition will be the moving-picture display, accompanied by lectures on the Islands. The moving pictures will be furnished by E. K. Bonine, the moving-picture expert. This whole collection of films will be one of the finest ever sent out from one country for educational purposes. The Bonine films are considered among the best produced. There will be hundreds of feet of them, and, in addition, about 800 stereopticon slides of Island scenes covering the industries. A lecture is to accompany each showing of films, and the Hawaiian musicians will sing and play appropriate music. Mr. Bonine is also preparing a large number of very beautiful photo-

graphic transparencies on glass. The Historical Hawaii exhibit will be shown by a special collection being prepared by Miss Ida Pope, E. Henriques, A. F. Judd and Commissioner Knudsen. They will try to present as nearly as possible every feature of Island life from the beginning to the present day.

Persons having something which they believe might be of interest to display at the fair, and wishing to assist the commissioners, may forward the same to Mr. Lloyd Childs at the Hawaii Promotion Committee.
